

THE MYANMAR DECENT WAGE SURVEY 2019

Codebook and explanatory note

Kea Tijdens

WageIndicator Foundation - www.wageindicator.org

WageIndicator Foundation is a non-profit NGO. It develops, operates and owns national WageIndicator websites with labour-related content, using data from its WageIndicator Salary and Working Conditions Survey, Minimum Wages Database, Collective Agreement Database, Salary Checks and Calculations, DecentWork Checks and related Labour Law Database, and Cost of Living Survey and resulting Living Wages Database. The mission of WageIndicator is to promote labor market transparency for the benefit of all employers, employees and workers worldwide by sharing and comparing information on wages, labor law and career. WageIndicator does so by making this information freely available on easy to reach and read national websites in the national language(s). Kea Tijdens is research coordinator of WageIndicator and the University of Amsterdam, Netherlands.

Centre for Economic and Social Development - https://myanmarcesd.org/

For this project, WageIndicator Foundation cooperated with the Centre for Economic and Social Development (CESD) in Yangon, Myanmar. CESD is an independent and non-political think tank supporting evidence-based policy making that mobilises development resources, both domestic and international, to bring Myanmar to her rightful place in the region and the world. Its mission is to provide evidence-based policy research, results-orientated knowledge sharing, and people-centered public advocacy to support the peaceful and sustainable transformation of Myanmar.

Acknowledgements

Many people contributed to the survey. CESD conducted the fieldwork for the Wages and Cost-of-Living surveys. WageIndicator designed and managed the survey, with contributions from Martin Guzi, Jakub Kostolný, Tomáš Kabina, Huub Bouma, Maarten van Klaveren. Iftikhar Ahmad contributed to the WageIndicator Minimum Wage Database. Paulien Osse, director of WageIndicator Foundation, managed the Decent Wage Myanmar project.

Funding

The Decent Wage Myanmar project was funded by Mondiaal FNV, Netherlands, as part of its Trade Union Cooperation Programme 2017–20. Grant number NL0810121.

1 The survey

Aims of the Decent Wage Myanmar project

The *Decent Wage Myanmar project* aimed to collect wage data and cost of living data for the creation of a level playing field in tripartite negotiations and consultations, in preparation of establishing new minimum wage levels in the country, which is scheduled to be concluded July 2020. The *Myanmar Decent Wage Survey 2019* aimed to report in detail the wages earned by Myanmar workers, including the self-employed, in selected sectors and regions. See for details about the project: https://wageindicator.org/Wageindicatorfoundation/projects/decent-wage-myanmar-phase-1

The questionaire

The questionaire in English and Burmese can be found in Appendix 1 of Tijdens K.G. (2019) Decent wages in Myanmar 2019. Amsterdam, WageIndicator Foundation, November. https://wageindicator.org/documents/publicationslist/wageindicator-org-publications-2019/myanmar-wage-report_20191125_final_english.pdf. The questionnaire is available in Burmese and in English.

For the *Myanmar Decent Wage Survey* 1 514 valid face-to-face interviews with workers in four regions and five sectors of Myanmar were held. The four selected regions were Ayeyarwady, Bago, Mandalay and Yangon. The selected five sectors were in garment (all regions), construction (Yangon), fishing (Ayeyarwady, Yangon), preparing food stuff/food processing and storing (Yangon), and agriculture (all regions).

Survey mode

For many years WageIndicator Foundation runs a multilingual, online web-survey about Wages and working conditions, and a multilingual, online web-survey about the Cost-of-Living. This questionnaire was adapted to become suitable for face-to-face interviews in Myanmar and to peculiarities of the labour market in Myanmar.

Survey pages

The questionnaire consisted of fifteen pages:

- PAGE_INTERVIEWER_START
- PAGE_BACKGROUND
- PAGE_INDUSTRY
- PAGE_INTRO
- PAGE_INTRO2
- PAGE_OCCUPATION1
- PAGE SATISFACTION
- PAGE_WAGE1
- PAGE_WAGE3

- PAGE_WAGE4
- PAGE_COMPENSATION
- PAGE_INTERVIEWER_START
- PAGE CONTRACT
- PAGE_WORKINGTIME
- PAGE_INTERVIEWER_END

The questionnaire included routing to ensure that no questions were asked to respondents to which the questions did not apply, e.g. self-employed had slightly different questions about their income than employees about their wages.

For many years WageIndicator has been conducting multi-country surveys. To measure so-called long-list questions about education, region, occupation or industry, WageIndicator has developed API's for its surveys. These API's contain for example the educational categories in the national language relevant for the country surveyed and includes a bridging variable to the standard ISCED classification of the UNESCO. Similalarly, they do so for the occupational categories to the ISCO classification of the ILO and to the NACE classification of industries.

Field work

Details about the field work can be found in Tijdens K.G. (2019) Decent wages in Myanmar 2019. Amsterdam, WageIndicator Foundation, November. https://wageindicator.org/documents/publicationslist/wageindicator-org-publications-2019/myanmar-wage-report_20191125_final_english.pdf

Variables

The questionnaire resulted in 81 variables, of which almost all are numerical and a few are alphanumeric. In addition, another 88 variables were generated from these variables or from the survey meta-data, such as year, month/week/day of survey completion, higher aggregates from the API variables education, occupation and region, time stamps for each page in the questionnaire, variables indicating the device of the respondent, and a like. See Section 2 for the list of variables and values.

Measuring wages

The survey questions asked for net wages in the national currency, for the pay period and for the related working hours. The wage data has been cleaned for typing errors and unlikely responses, and then an hourly wage was calculated. Researchers should use either the variable WAGENEHR (Net HOURLY wage in nat. currency) or WAGEHRPP, which is the PPP adjusted USD hourly wage. The variables WAGENEBEL (Net wage below 1 PPP-harmonized US dollar per hour) and WAGENEABO (Net wage above 400 PPP-harmonized US dollar per) indicate that the wages are below or above the expected range.

Anonymous

Respondent's privacy is protected. In the survey data it is not possible to identify a single individual by name. The dataset does not include the details of respondent's regio, industry or occupation, only the aggregated variables.

Non-commercial

The survey had no partners who had a commercial interest in the data.

2 Variable and value labels

Variable	Variable Label	Value	Value Label
surveparticipation	Are you prepared to cooperate in the survey/complete the check?	0	No
		1	Yes
nrofjob1	Has a paid job - as an employee, self-employed or otherwise	0	No
		1	Yes
